Experience

2015	<div><div></div>RE/MAX Living Cape Town</div> <p>I worked for a year at the head office of RE/MAX Cape Town as a graphic designer. I was in charge of creating all printed work for RE/MAX Cape Town, from billboards, newspaper adverts, flyers etc.</p> <p>During this time I also worked on creating an online gallery for agents to view previous adverts done.</p> <p>Each agent wanted their own signature look and feel. I had to take what they wanted for their image and merge it with the RE/MAX brand requirements. This was an exciting challenge that I faced while working there.</p> <p>References: Susan Watts, Broker/Manager - 079 896 0427</p>
2017	<div><div></div>Highbury Safika Media</div> <p>I worked as the main front-end developer for Highbury Media, working on websites for Cape Town Etc, Popular Mechanics and Motor Magazine.</p> <p>My main role was to come up with new and original designs for the various websites, I developed a large portion of the new front-end working mainly with HTML/CSS, JS and Wordpress.</p> <p>I had to work closely with the designers of each magazine to get a complete understanding of what the websites would require and translate the designs to work with the rest of the dev team.</p> <p>References: Adrian Brown / CTO - 073 141 0314</p>

Jan 2018 - June 2018	<div><div></div>Startup & React.js</div> <p>I learnt a lot from Highbury Media, and as I learnt, so did my hunger to learn more. I decided to take my December and Jan to learn some advanced JS and React.js. I saw the value and also the need for a front-end framework like React.</p> <p>Shortly after I learnt React, I was approached by a startup to design the UX/UI and help conceptualize various features for the application.</p> <p>I designed the initial design for the application, the investment presentations and the final UX/UI prototyping.</p> <p>I was also included in the initial investor proposal meetings where I learnt invaluable business sense. The startup has now recieved funding for it's initial phase.</p> <p>Because it is still under development, I am under a confidentiality agreement and can only disclose the various technical aspects I worked on the project.</p>
