

## Personal Statement

Currently a Senior Web Developer, aspiring Fullstack Developer. Having started as a graphic designer, I feel that this has given me a different view on how certain programs and applications should work and feel. Taking a UX approach to every program I design and build.

By taking a more creative approach to solving programming problems, I feel that this gives me a key understanding on how programs can be built from concept, all the way to how that data sits in the database.

Working in SQL/Mongo, .Net Core and Angular/React has given me a full understanding of systems and how they work with each other. Using this understanding and combining it with creative and usable ideologies allows me to make a more well rounded final product that fits the client's visual and practical needs.

I enjoy a good challenge and being creative, that's why in my spare time I enjoy game design and development using Unity C# and Blender.

## Career History & Expertise

```
class DarianSteyn {
  constructor() {
    this.name = 'Darian Steyn'
    this.dateOfBirth = '03/05/1995'
    this.email = 'dariansteyn.design@gmail.com'
  }
  workExperience() {
    return [
      { '2015-2016': 'Designer - Remax Living' },
      { '2016-2017': 'Higher Certificate - Web Development' },
      { '2017 - 2018': 'Junior Front-end developer - Highbury Saficka' },
      { 'Jan 2018 - June 2018': 'Front-end developer - BuildCoin startup' },
      { 'August 2018 - August 2019': 'Intermediate Web Developer - Digioutsourcing' },
      { 'August 2019 - present': 'Senior Web Designer/developer - Digioutsourcing' }
    ]
  }
  skills() {
    return [
      { 'Design Applications': [PhotoShop, Illustrator, Adobe XD, Adobe After Effects, Indesign, Sketch] },
